Object : Certificate of conformity to European regulations (UE) n° 10/2011 and (UE) 1935/2004

Dear Customer,

Following your request regarding the food compliance of the above mentioned item, we certify that the raw material used in production is in conformity with the current European regulations related to food contact (regulations 10/2011 and 1935/2004). Yet, it pertains to end-users of materials intended to come into contact with food, to ensure that the material does not bring about an unacceptable change in the composition of the food, or bring about a deterioration in the organoleptic characteristics which render it unfit.

Commission Regulation (EU) No 10/2011 and its amendments

We would remind you that the assessment of overall migration limits and any other specific migration limits such as the release of aromatic amines in a detectable quantity into food or food simulants are the responsibility of the producer of the finished article (converter).

The validity of this certification will depend on the way this item will be stored or handled, and on the conditions of use defined by usages or professional laws based on the related item technical specifications.
